TEHRAN, IRAN

Ali Badri

OCR & Document AI Engineer

Data scientist · M.Sc. Artificial Intelligence student

I build systems that turn scanned, handwritten, and complex documents into useful structured data, with a focus on **Persian and Arabic-script** content.

Experience

AI Programmer · Part-time — May 2021 – Present

Bamdad (Asre Pardazesh) · Tehran, on-site

- Computer vision and NLP for Persian and Arabic-script documents: text detection, recognition, page orientation, and document classification.
- Recent work: fine-tuning, serving, and evaluating vision-language and speech-recognition models.
- Training-data tooling: synthetic data, labeling and review apps, and dataset quality checks.

Computer Vision · NLP · Statistical Data Analysis · Python

Data Engineering & Data Science Intern — Oct 2022 – Oct 2023

Nokhbegan Javan (Young Elites)

Skills

Document AI & vision

OCR · Text detection · Text recognition · Page orientation · Document classification · OpenCV · Ultralytics

Machine learning

Machine Learning · Deep Learning · PyTorch · TensorFlow · scikit-learn · Transformers · PEFT / LoRA · vLLM · Time series · Statistics

Persian & Arabic script

Text normalization · RTL & bidi text · Fonts & glyph coverage · Persian-aware metrics · Speech recognition

Data & analytics

Pandas · NumPy · Matplotlib · Seaborn · Power BI · Excel · Data preprocessing · Data visualization

Languages & services

Python · R · SQL / MySQL · TypeScript · JavaScript · Bash · FastAPI · Flask · Django · React

MLOps & tooling

MLflow · DVC · Docker · SQLite · Linux · Git

Education

M.Sc., Artificial Intelligence — Sep 2024 – Present

Islamic Azad University, Science and Research Branch

B.Sc., Computer Science — 2020 – 2024

Kharazmi University

Courses & certificates

Data Science course completion certificate, Toseh Institute · Jul 2022

Knowledge Graphs for RAG, DeepLearning.AI · Jan 2025

Projects & open source

labelme-modern

A small fork of *Labelme* for image annotation: flat dark theme, atomic label-file saves, per-folder resume, suggestion management, and right-to-left direction switching for Persian, Arabic, and Hebrew text.

House-price prediction

A data science project on Kaggle, built during a data science course.
